The painter, creator has a great role and responsibility. Painter's role is to determine, classify, begin and finalize the painting by giving the form to the story. The painter's responsibility is to share his own talent among those that will be enjoying his artworks. Agron Mulliqi is painter and creator. Very productive and inspiring, he has a wide scope of expression very specific and possible to be recognized.

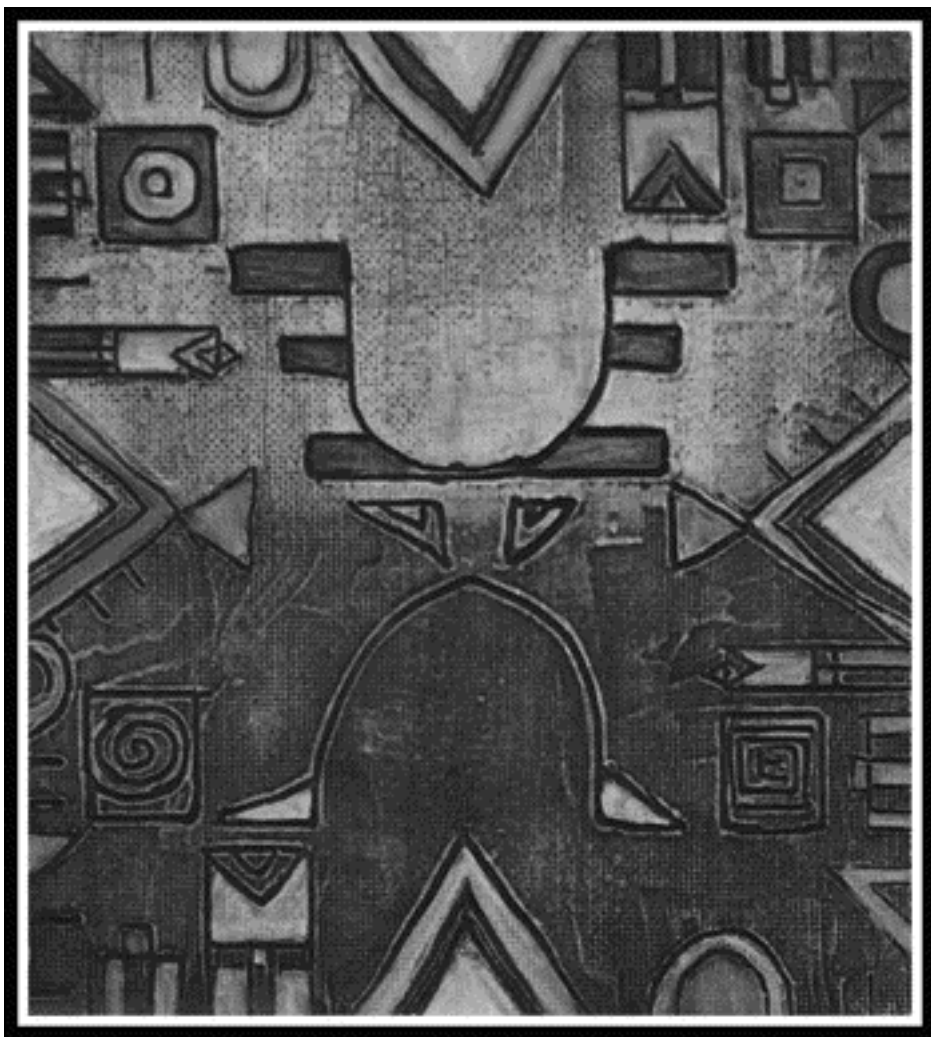

In the current exhibition "Four Sides", 30 artworks are presented. Author in presented artworks illustrates human beings and ethnos as author's common theme. The human being is presented through its human and physical characteristics, the beauty of nature, between the real and surreal, consciousness and un- consciousness, destructed with real and daily problems in same way as it occurs in life situations. The ethno motives are author's symbolic toys that help him making the stories. Those stories are balanced, dynamic and created to be liked.

By this exhibition the author only touched the part of his wide range of artworks and once again confirmed the astonishment to his recognizable style.
